About the dataset
The dataset offers detailed information on metro stations and their associated gates within the Delhi Metro network. It consists of two primary sheets: Stations and Gates, each containing essential details.

1. Stations Sheet Metadata

#	Field Name	Description
1	Line	The metro line on which the station is located.
2	Station Code	Unique code identifying each station.
3	Name	Official name of the station.
4	Type of Station	Specifies if the station is elevated, underground, or at grade.
5	Interchange (Y/N)	Indicates whether the station is an interchange.
6	Latitude and Longitude	Geographical coordinates of the station.
7	Station Commercial Name	Alternate name used commercially, if applicable.

2. Gates Sheet Metadata

#	Field Name	Description
1	Station Code Name	Links each gate to its respective station.
2	Gate Name	Unique identifier for each gate at a station.
3	Location	Location of the gate.
4	Gate Latitude and Gate Longitude	Geographical coordinates for each gate location.
