About the dataset

The DMRC Yearly Origin to Destination flow dataset provides monthly passenger flow data between metro stations in the Delhi Metro network for the year 2024. The dataset includes separate sheets for each month, from January to July 2024, detailing the passenger counts for trips originating from and terminating at specific stations. This dataset captures monthly Origin-Destination (OD) flows, providing insights into travel patterns and demand between Delhi Metro stations over time.

1. OD Flow Metadata

#	Field Name	Description
1	Stn	Origin Station Code
2	Other Columns	Represent destination stations by code, with each cell indicating the passenger count from the origin (row) station to the destination (column) station
