About the dataset
The dataset provides information on the number of entries and exits at various metro stations throughout the day. The data is organized into two sheets, Entry and Exit, capturing hourly footfall counts for each station.

1. Entry and Exit Sheet Metadata

#	Field Name	Description
1	businessday	Date of recorded entries.
2	lineid	Identifier for the metro line.
3	Siteid	Identifier for the metro station.
4	sitename	Name of the metro station.
5	TransactionType	Specifies that the transaction is an "ENTRY" or “EXIT”.
6	HR4 to HR24	Hourly entry counts from 4 AM to midnight.
